Concurrent Enrollment FY1213 Changes to the Master List of Approved Alignments

Published December 9, 2011

Highlights

1. Of the 39 classes no longer offered for Concurrent Enrollment, 19 had been on hiatus for low enrollments one or more years, 3 represent courses replaced by a new course, and 2 are elimination of a dual-aligned course (the class remains on the approved list but only aligned one time).

2. Of the 16 new classes, 5 are Technology Intensive Hybrid courses being developed by teams of Utah System of Higher Education faculty. The faculty teams are on task developing the curriculum. Details, particularly about how and where the classes will be taught will be shared mid-January.

3. See the full Master List for a complete list of courses on hiatus. FY1213, there are 70 new and 6 existing course on hiatus. The overwhelming reason for hiatus is low wnrollments and/or lack of a qualified instructor. For many of these classes, unless there are changes FY1213, they will be moved to cancelled the following year.
