

Standard 03 – HTML	1	2	3	4
Use HTML to create attractive Web pages.				
<p><i>This includes the following: create paragraphs, line breaks, horizontal rules, ordered and unordered lists, and tables with an emphasis on proofreading, spell checking and grammar; use headings and font attributes; create hyperlinks and e-mail links; insert images and include attributes (such as alt, vspace and hspace, size, align, etc.); use colors to change backgrounds and text; use images for backgrounds; and discuss the difference between HTML and XHTML. For example: view a tutorial on the differences through the Internet; and demonstrate CSS--cascading style sheets (optional).</i></p>				
Standard 04 – Commercial Web Design Software	1	2	3	4
Use commercial web design software (i.e.; Macromedia) to create attractive web pages.				
<p><i>This includes the following: create paragraphs, line breaks, horizontal rules, ordered and unordered list, and tables with an emphasis on proofreading, spell checking and grammar; use headings and font attributes; create hyperlinks and e-mail links; insert images and include attributes (such as alt, vspace and hspace, size, align, etc.); use colors to change backgrounds and text; use images for backgrounds; modify page properties. Link a web page to one or more of the following: a Word, PDF, Excel or PowerPoint document; create a website using CSS and /or templates; post and/or understand how to post a web site on the Internet.</i></p>				
Standard 05 – Images	1	2	3	4
Create and prepare images to integrate with web site designs.				
<p><i>This includes the following: open and save an image in a web friendly format; crop and resize various images; add a border and/or drop shadow to an image; optimize an image; make buttons and/or navigation bar; enhance an image to improve photo quality; use scanner and or digital camera to incorporate photos into a Web page; create a logo and/or banner to incorporate into a Web page.</i></p>
