SIS 2000+ Training Manual

Screen Result Edit

Purpose

This program is used to define the available choices for the Results field in the Screenings Program.

Training Objectives

Add result entries.

Accessing Screen Result Edit

To activate the Health menu click on the **Health** button (or Alt+H on the keyboard) from the SIS 2000+ main menu. To activate the Screening Results program, click on the **Screen Result Edit** (or Alt+c) button.
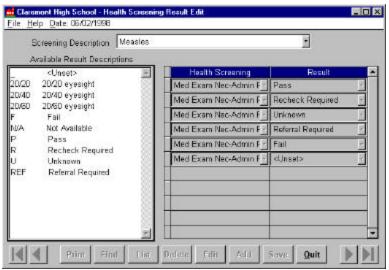

Tasks

<u>Add Result Entries</u>

Use the drop-down list to choose a Screening Description. (These descriptions are defined in the Health Screening Type code table).

Health Module "Screen Result" Edit Screen

To add a result, double click on a description in the left-hand column that applies to the screening. You can also highlight the description and drag it over to the right. (The Available Result Descriptions are defined in the Health Screening Results Codes table).

Health Screening Result Edit Screen

Click **Quit** to Exit.
