Adding a Language to Language Codes Table

To add a new language so they will appear in the Home Language and LEP Student Language fields, go to System/Table Editor and in the top table field, choose Language codes (see example). Find the language in the excel file at

http://www.schools.utah.gov/curr/ELLALS/doc/language_codes.xls. If you don't find the language you need in this file, call Rita Brock 801 538-7879.

Click on the add button. In the first column you have to type in a code of your choosing. You need to make sure the code has not been used on any other language. Type the language description you will see in the dropdown box in the language fields in the student editor. Type the Federal Language Code

from the Federal Language Excel file. Check on the box in the fourth column, put nothing in the fifth column, and type a 1 in the sixth column. Click on Save.
