

Richard Brown

Richard Brown's master was a bucket maker. All day	9
long Richard worked hard making buckets. He was a good	19
bucket maker- clever, too, and wise.	25
Everyone in the kingdom was not as wise as Richard.	35
Most people thought the earth was flat and the sky was a	47
great bowl covering the earth. They believed the moon was	57
made of green cheese. They were sure the sun was a hot,	69
yellow plate. They even thought that frogs had magic	79
power and could change into people at a minute's notice.	88
Richard Brown was too smart to believe such things.	97
He knew the earth was round and the moon was not made of	110
green cheese. He was certain that a frog was just a frog and	123
could never become a real person.	129
