

All About Koalas

Koalas are cute animals. Some koalas live in zoos	9
in our country. Do you know what koalas eat? At first,	20
they drink their mothers' milk. Later, they eat special	29
leaves. These are eucalyptus leaves. Koalas use their	37
noses to smell the leaves. They will not eat leaves that	48
smell bad. Koalas do not drink much water. They get	58
their water from the leaves. Guess what the word <i>koala</i>	68
means? It means "no drink."	73
