I am going to read you some interesting information about trees. Listen carefully.

Trees are all around us. Trees grow. Trees have different parts. Each part has a special job.
The leaves make food for the tree.
The leaves also give us shade.
The roots take in water for the tree. The roots hold the tree in the ground.
Trees have stems called trunks. Trunks can be thin or fat. The trunk holds the tree up.
Trees are the largest plants on Earth!
