- * Generated Codes are not entered by LEAs, but are calculated based on codes in two or more fields entered by the LEA.
- ** These students are continuing; however, if one of these codes is attached to the last known record of a student (the student does not reappear in the state system by Sep 30 the following school year) then the student will be treated as UN, Unknown, which is a dropout.
- ^ GA and RA codes are only for use by students with a Significant Cognitive Disability (SCD) on path to an Alternate Diploma (see [Board Rule R277-705](#)). If the RA code is assigned to a student in their cohort year the student will have their cohort year reassigned to one year later. If the student fails to enroll in school during the reassigned cohort year and the RA code was the last code assigned to the student they will be treated as a dropout in their cohort and will no longer be eligible to have their cohort year reassigned.
