The Title III Specialist will set the dates with the ALS Director for classroom observations and programmatic support. A Utah Grants site visit will be set up weeks before the visit to facilitate the transfer of documentation. A list of needed documents and policies will be uploaded to the site visit with instruction for the LEAs to upload the needed documentation to the site visit. The official USBE Title III report is designed to provide both commendations and recommendations for each school visited and the LEA. The Fiscal Monitoring Report will provide findings and an opportunity to evaluate program effectiveness. The Title III Fiscal Monitor, in conjunction with the Title III Specialist, will communicate with the members of each approved consortium, that is, those LEAs with a Fiscal Agent as a member (see MOU on Title III website under Monitoring).
