DLM Students and Rosters flowchart

Here is a flowchart to help clarify the process of how a student gets assigned into the DLM assessment system and how they get rostered to a particular teacher:

IEP Team decides student will access Essential Elements and take the DLM assessment

Student gets flagged 1% in the SIS (student information system)

UTREx then carries the students SIS information including SCRAM information into the DLM sysytem

The student is then rostered to the teacher that they are enrolled with in the SIS system for Math and ELA

If the student is enrolled with the correct DLM administration teacher the roster should be accurate (an essential elements course)

If the student is enrolled with a non-DLM administration teacher the student will be put on the wrong roster (resource/gen ed course which is prefectly okay)

Contact USBE

David Sallay or Tracy Gooley to get the student rostered to the correct teacher
