The purpose of these essential standards is to provide educators with a prioritized list of standards to focus on during COVID-19.

While all standards have value, COVID-19 may limit instructional hours. The essential standards are intended to help teachers identify which standards to focus on. While these are the essential standards, if there is more instructional time, the recommendation is to extend the instructional focus to all standards.
K-6 VISUAL ART ESSENTIALS for 2020

Preparing to return to the art classroom will take creativity, planning, and a “can do attitude” this year. This document is designed to provide elementary teachers and specialists with recommendations, resources, and essential concepts to continue to provide students a well-rounded education which includes the arts.

The fine arts provide a place for students to explore new ideas, safely take risks, creatively solve problems, collaborate and work with others, develop aesthetic awareness, explore other cultures and the world, and express oneself. The arts can provide students with the social and emotional skills needed to stay grounded during these unusual times.

TIPS & RECOMMENDATIONS:

- Focus on the Connect and Respond strands of the Visual Art Standards and use Create and Present to reinforce concepts.
- Be prepared and flexible as many materials-rich lessons may need to be modified.
- Create individual student kits. If possible, provide each student a kit of “high-touch” supplies – such as pencils, erasers, drawing materials, and brushes – that can be carried with them. Develop a “minimum is best” list of art supplies that can be used for each project.
- Consider mobile teaching options. For example: “Art on a cart” may be a safer approach to have teachers move from space to space rather than students moving. This can minimize the number of tools and spaces that need to be cleaned/sanitized regularly.
