In the following report, Hanover Research and ULEAD examine research-based strategies for effective social-emotional learning (SEL) programs in PK-12 schools. This report is intended to support districts working to improve their social-emotional learning curriculum and instruction and standardize implementation across school sites.

EXECUTIVE SUMMARY

INTRODUCTION

Social-emotional learning (SEL) is emerging as a key indicator of student success. SEL correlates with positive academic outcomes,1 and employers increasingly emphasize “soft skills” as necessary traits for success in the workplace.2 Furthermore, the 2015 federal Every Student Succeeds Act (ESSA) encourages states to integrate non-academic measures—including SEL—into their school accountability systems.3

To provide high-quality support and services to its districts and constituents, Utah Leading through Effective, Actionable, and Dynamic Education (ULEAD) is interested in understanding best practices in social-emotional learning. To support this effort, Hanover Research (Hanover) reviewed empirical research, expert literature, and state and district SEL policies around SEL implementation. This report includes two sections:

- **Section I: Defining Social-Emotional Learning** explores definitions of SEL and discusses the core competencies associated with SEL.
- **Section II: Implementing Social-Emotional Learning** investigates district-, school-, and individual-level strategies that support SEL. These strategies range from establishing a positive school climate, to valid assessments, to classroom instruction.

RECOMMENDATIONS

Districts leaders should consider:

- **Implementing a robust, integrated SEL curriculum.** Typically, SEL curriculum models include direct instruction of SEL competencies and integrate SEL into core subject matter. The curriculum may also include active learning and take-home activities.

- **Incorporating SEL into all district operations to extend the reach beyond the classroom.** In addition to providing SEL instruction to students, districts should also offer SEL training to staff members and engage families in the SEL programming.

- **Evaluating the efficacy of SEL programming using a mixed-methods approach to evaluation.** More specifically, districts can use observational methods, surveys, character report cards, and performance-based tasks to evaluate students’ social emotional skill development.

---

1 “SEL Research.” CASEL. http://www.casel.org/research/
KEY FINDINGS

- SEL refers to the skills and knowledge that students need to communicate effectively, interact with peers, resolve conflicts, and manage their emotional responses to stressful situations. Though precise definitions of SEL vary, most researchers agree that SEL programming should address communication, executive functioning, and problem-solving skills. For example, the Collaborative for Academic, Social, and Emotional Learning (CASEL) defines SEL in terms of five competencies: self-awareness, self-management, responsible decision-making, relationship skills, and social awareness.

- To standardize SEL programming across the district, districts should develop their own definition of SEL, a vision statement, and a districtwide implementation plan. The district should form a committee of school stakeholders to review school resources, assess the role of SEL in the district, and then draft the vision statement and implementation plan. A clear vision statement articulates a district’s desired outcomes and primary motivation for delivering SEL. The implementation plan details a timeline for SEL program design and delivery, outlines key practices school staff will use, and sets specific and measurable objectives for SEL programming.

- SEL programming should encompass both academic and non-academic aspects of district operations. Staff members should model SEL competencies in their daily interactions with students and each other, and the district should provide targeted training to develop employees’ own SEL competencies and ability to deliver SEL instruction. In addition, the district should develop clear policies to guide implementation of SEL programming and use multifaceted communication strategies to engage families and communities in the SEL process.

- SEL curriculum models feature direct instruction of SEL skills, integration with academic subject matter, active learning tasks, and supplemental home-based activities. Through explicit skill instruction, teachers can describe and model strategies for students to use in their own lives and clarify situations where skills are best applied. Active learning opportunities, such as role-playing and games, also help students practice SEL skills. Teachers can also promote SEL development at home by assigning students work to complete with their parents. Importantly, SEL instruction is most effective when classroom management strategies encourage positive behavior, allow autonomy, and facilitate dialogue about students’ development.

- The efficacy of SEL programming can be evaluated using student observations, surveys, student report cards, and performance tasks. Teachers can gather and provide qualitative feedback on students’ SEL competencies using tools such as narrative reports, checklists, and survey instruments. Some schools issue “character report cards” or incorporate SEL assessments into regularly issued academic report cards, allowing for consistent opportunities to provide feedback and track student progress. Further, performance tasks require students to complete activities that evaluate their understanding of social and emotional dynamics as well as their ability to assess interpersonal exchanges.
SECTION I: DEFINING SOCIAL-EMOTIONAL LEARNING

This section presents definitions of SEL and its core competencies. This section also describes how such definitions may be applied in a school setting, including recommended processes by which a district can establish its own definition, vision, and plan for implementing SEL.

OVERVIEW OF SOCIAL-EMOTIONAL LEARNING

Researchers, educators, and state departments of education have developed multiple definitions of SEL. In a 2017 report, researchers from the Harvard Graduate School of Education note that SEL is defined in a variety of ways and often serves as an umbrella term for specific sub-fields of psychology and human development. Definitions of SEL may include references to cognition, behavior, executive functioning, and character. Given the conceptual fluidity surrounding SEL, researchers advise districts to establish their own understanding of and definition for SEL to ensure consistent program implementation across school sites. This subsection presents a selection of commonly-embraced definitions of SEL.

Broadly speaking, SEL refers to the skills and practical knowledge that students need to communicate effectively, interact with peers, resolve conflicts, and manage their emotional responses to stressful situations. The Collaborative for Academic, Social, and Emotional Learning (CASEL)—an organization dedicated to the promotion of SEL—defines SEL as:...

...the process through which children and adults acquire and effectively apply the knowledge, attitudes, and skills necessary to understand and manage emotions, set

---

6 Ibid.
and achieve positive goals, feel and show empathy for others, establish and maintain positive relationships, and make responsible decisions.

Other organizations define SEL in the context of college and career readiness. The National Conference of State Legislatures (NCSL) states that the skills developed through SEL “round out a student’s education and impact his/her academic success, employability, self-esteem, relationships, as well as civic and community engagement.” The Committee for Children—a nonprofit organization that promotes SEL and the overall safety and well-being of children—reinforces this determination by analyzing the applicability of SEL-based skills to the professional sphere (see Figure 1.1). Namely, behaviors developed through SEL (e.g., empathy, impulse control) can help students adapt to dynamic work environments and collaborate effectively among a diverse professional staff.

### Social-Emotional Learning Frameworks

CASEL developed one of the most comprehensive frameworks for defining and implementing SEL, consisting of five core competencies, as described in Figure 1.2 on the following page. Self-awareness and self-management directly relate to an individual’s ability to recognize and regulate their emotional reactions and direct behavior accordingly. Social awareness and relationship skills impact interpersonal interactions, specifically a person’s ability to assess the emotions of those around them and to respond appropriately. Responsible decision-making refers to an individual’s ability to make judgments about their own and others’ emotions and actions to solve problems and to facilitate constructive exchanges with others.

Source: CASEL

Researchers from the Harvard Graduate School of Education developed a similarly comprehensive framework that includes 12 different SEL skills linked to student outcomes (see Figure 1.3 on the following page). Under this paradigm, ten skills are divided into three categories—cognitive, emotional, and behavioral—with two other additional skills. These skills relate to a student’s ability to manage multiple cognitive and emotional demands while navigating social dynamics with poise and positivity.\(^\text{15}\)

COMMON SOCIAL-EMOTIONAL LEARNING DEFINITIONS AND PROTOCOLS

Effective implementation of SEL requires a shared definition, vision statement, and implementation plan to articulate what students will be offered through SEL and outline a common foundation for program design. When a district has a clear definition and a comprehensive vision statement, stakeholders can better understand how SEL matches district priorities and inspires support to achieve target outcomes. CASEL recommends that districts draft policy documents after introducing SEL to relevant stakeholders but before developing a formal curriculum. The SEL definition and vision statement should come first, followed by the implementation plan.17

---

16 Figure adapted from: Ibid.
CASEL recommends that districts form a collaborative committee representing key stakeholder groups to develop SEL definitions and vision statements. This team should consider the following key questions to clarify district objectives:18

- What do we want all students to know and be able to do upon graduation? What social and emotional competencies should they have?
- What are our district’s goals, outcomes, and/or core values?
- How does SEL promote those goals, outcomes, core values, and student skills?
- What kind of culture and climate does our district want?
- What will our district look like after achieving our SEL vision?

Once committee members have articulated answers to these questions, they can compose preliminary drafts of SEL definitions and vision statements and solicit feedback from the broader district staff and community. Districts should communicate the finalized policy documents to stakeholders and revise those documents as necessary.19

Figure 1.4 on the following page displays CASEL’s recommended process for developing a comprehensive plan to implement SEL, to be guided by the finalized definition and vision statement. Districts should assemble another collaborative team to draft the plan and publicize its importance to the community. In this process, the committee should assess district resources, align them to support SEL programming, and research effective SEL practices. As the district composes the plan, it should invite feedback from relevant stakeholders to ensure consistent understanding of and commitment to the plan before finalization and publication.20

### Figure 1.4: SEL Planning Process

<table>
<thead>
<tr>
<th>STEP</th>
<th>DESCRIPTION</th>
</tr>
</thead>
</table>
| 1. Prepare for planning sessions | - Identify possible SEL planning committee members.  
- Establish a timeline for creating the plan.  
- Look for ways to publicize the importance and purpose of SEL. |
| 2. Draft the plan | - Conduct a resource and needs assessment across the district and schools.  
- Align resources to support SEL programming.  
- Develop expertise in SEL theory, research, and practice.  
- Design and implement effective professional learning programs.  
- Communicate about SEL with a variety of stakeholders.  
- Establish PK-12 learning standards for SEL.  
- Adopt and implement evidence-based SEL programs in all schools.  
- Integrate SEL with other existing priorities, including academic instruction.  
- Establish systems to improve SEL programming. |
| 3. Solicit feedback and revise the plan | - Provide other key stakeholders the opportunity to provide feedback.  
- Revise and finalize the plan. |
| 4. Publicize the completed SEL plan | - Present the plan to key stakeholders who were not involved in its development.  
- Integrate the plan into the district’s web presence.  
- Revisit the planning timeline regularly and publicize progress toward goals. |
| 5. Review and update plan | - Revise the plan using data from benchmark assessments and for shifting priorities. |

21 Figure adapted from: Ibid.
SECTION II: IMPLEMENTING SOCIAL-EMOTIONAL LEARNING

This section discusses instructional strategies, curricula, and assessments that support effective SEL. The section begins with an overview of organizational practices that promote SEL, then discusses curriculum and instruction, and concludes with an examination of SEL assessments.

ORGANIZATIONAL PRACTICES

CASEL emphasizes that “SEL is not a standalone program, but rather, a set of principles and practices that support success across your district.” In addition to offering SEL instruction at the classroom level, districts can integrate SEL into all aspects of daily operations to ensure a systemic commitment to SEL. SEL is more effective and sustainable when delivered through multiple structures, and systemic adoption may improve the likelihood that SEL programs persist through staffing changes, budget reductions, or shifting district priorities.

Districts should actively foster safe and supportive academic, disciplinary, and physical environments, and encourage respectful, caring relationships among staff and students. District- and school-wide activities (e.g., assemblies) can encourage positive behaviors, beliefs, and values, and adult behaviors should mirror this positivity. District leadership can also publish clear policies to reinforce SEL practices and to facilitate consistent protocols across school sites. Such guidance may extend to extracurricular activities, such as sports and clubs, using supplemental learning tasks. Implementing these initiatives will help establish a positive learning environment characterized by strong interpersonal relationships and students who feel secure to take risks and confident that their basic needs will be met.

Additionally, districts should provide staff with professional development opportunities and guidance on how to implement SEL. Training sessions must conscientiously target specific staff populations and should be tailored to district and school needs. Schools may

---

23 Ibid.
use a professional learning community (PLC) model to deliver training or integrate training into existing meetings. Site visits to other schools that are already using SEL and inviting outside consultants to discuss SEL are other effective options for professional development. Districts may also partner with peer districts to exchange information about SEL practices and facilitate knowledge sharing. As an example, Davis School District in Farmington, Utah offers professional development for its teachers on creating positive learning environments, helping students learn what to do when they are a victim of or witness bullying, and supporting students with anxiety or oppositional behaviors.

To supplement the knowledge gained from training, districts should draft clear policies on mandatory features of SEL and how to implement SEL with special populations of students (e.g., students with disabilities). District protocols should offer guidance such as who will deliver SEL instruction and what resources will be used in delivery (see Figure 2.1). Staff should also receive access to supports such as tool kits, coaching opportunities, scripted lessons, and strategies to adapt materials to diverse contexts.

**Figure 2.1: Considerations for Implementing SEL Organizational Practices**

- Who will implement the program? Most programs require that teachers facilitate activities, but others allow counselors, youth advocates, mentors, and other qualified personnel to do so.
- When should the program be implemented? During what subject, period, or time of day? Will schools have a choice?
- How will the program be implemented? Through direct instruction? With technology? With pre-determined instructional strategies?
- What time frame does implementation require? How often is the program implemented? For how long? With what gaps in between?
- Will the district require the use of supplemental materials, or will this be the school’s choice? If required, when should supplemental lessons be implemented, and by whom?
- Will the district require the use of family lessons or take-home materials, or will this be the school’s choice? If required, when should these be implemented and by whom?

Source: CASEL

Schools should engage families in SEL through targeted activities and special events. For example, teachers may send home assignments for parents to complete with students targeting a specific SEL skill. Similarly, the district may host a family workshop about students’ emotional and behavioral development. Practices such as career nights and community service projects can also build connections between students and their local communities.

---

33 Figure adapted from: “Programming,” Op. cit.
Further, districts should implement a comprehensive communication initiative to increase family and community investment in SEL programs. When formulating communications, districts should consider the intended audience, desired message, and medium of delivery. A successful communication campaign can help increase awareness, encourage family and community enthusiasm, and invite stakeholder participation in SEL programs. Possible strategies that communication plans might include are:

- Launch materials for key stakeholders;
- A website to introduce parents to SEL;
- A research brief for funders;
- Press releases and articles in local newspapers; and
- A website with general information about SEL as well as district-specific information about SEL standards, metrics, and data.

**INSTRUCTIONAL PRACTICES**

**CURRICULAR PROGRAMS**

This section describes three established SEL curriculum models: the 4Rs Program, PATHS, and Expeditionary Learning. Common elements identified in these and other SEL curriculum models include direct instruction of SEL skills, integration with academic subjects, active learning activities (e.g., literary analysis, projects), and supplemental home-based activities.

**4RS PROGRAM**

The 4Rs Program (Reading, Writing, Respect, and Resolution) integrates SEL instruction into language arts activities for students from PreK to Grade 5. In 2013, CASEL identified the program as an effective SEL program for preschool and elementary school implementation, citing its opportunities to practice SEL skills and its extensive integration into classroom, school, and family contexts.

The 4Rs Program uses children’s literature as an anchor to explore themes such as conflict, feelings, relationships, and community. Students participate in reading, writing, discussion, and skills practice to encourage a multitude of SEL behaviors such as assertiveness and cooperation. The curriculum is grade-specific, featuring age-appropriate activities, books, and teacher guides to support instruction. Specifically, the 4Rs curriculum features seven units.

---

36 Bulleted text quoted verbatim from: Ibid.
and an average of 35 lessons per grade featuring integrated language arts and SEL in tandem with explicit skills instruction. Classroom activities include extension activities, infusion ideas, and recommendations for further reading. The 4Rs program even includes 4Rs Family Connections, activity sheets that students can complete at home with their parents.\(^\text{40}\)

Notably, the 4Rs Program has proven to demonstrate a positive impact on students’ SEL competencies.\(^\text{41}\) In a study tracking a Grade 3 cohort’s development from 2003 to 2006 in New York City’s public schools, students receiving 4Rs-based instruction displayed the following attributes when compared to students in a control group receiving no 4Rs instruction:\(^\text{42}\)

- Lower levels of teacher-reported aggression;
- Less tendency to ascribe hostile motives to others in ambiguous social situations;
- Fewer symptoms of depression;
- Fewer symptoms of attention and hyperactivity problems; and
- Increases in social competence.

**PATHS**

CASEL also named the PATHS (Promoting Alternative Thinking Strategies) curriculum as an effective SEL program for preschool and elementary students, citing its explicit skills instruction and extensive integration into classroom, school, and family contexts as strengths.\(^\text{43}\) The curriculum features lessons and instructional materials that develop “emotional literacy, self-control, social competence, positive peer relations, and interpersonal problem-solving skills” designed for students from PreK to Grade 6.\(^\text{44}\)

PATHS instruction is typically delivered two or three times per week in 30-minute sessions.\(^\text{45}\) Lessons follow a script that progresses from an introduction reviewing lesson background and objectives to activities related to the target SEL concept or skill. Lessons end with suggestions for how to apply newly-learned skills and knowledge beyond the classroom.\(^\text{46}\) In addition,
lessons provide materials for students to bring home and suggestions for supplemental home-based activities to build parental support and encourage involvement.⁴⁷

A 2015 research study published in *Psychology of the Schools* found that students participating in the PATHS program “demonstrated increases in emotional understanding and prosocial behavior.”⁴⁸ Further, another evaluation of PATHS published in *The Journal of Primary Prevention* concluded that preschool students receiving PATHS instruction “had higher emotion knowledge skills and were rated by parents and teachers as more socially competent compared to peers.”⁴⁹ PATHS students have also displayed improvements in their:

- Problem-solving and planning skills;
- Ability to tolerate frustration;
- Working memory; and
- Impulsivity control.

**EXPEDITIONARY LEARNING**

Expeditory Learning focuses on three dimensions of student achievement – knowledge and skills mastery, character, and high-quality student work – and builds upon ten foundational principles (see Figure 2.2). These principles promote SEL and help students develop competencies that bolster perseverance, empathy, responsibility, and collaboration.⁵¹

---

**Figure 2.2: Ten Building Blocks of Expeditionary Learning**

| 1. The Primacy of Self-Discovery | 6. Collaboration and Competition |
| 2. The Having of Wonderful Ideas | 7. Diversity and Inclusion |
| 3. The Responsibility for Learning | 8. The Natural World |
| 4. Empathy and Caring | 9. Solitude and Reflection |
| 5. Success and Failure | 10. Service and Compassion |

Source: EL Education⁵²

In its 2015 guide to effective SEL programs for middle and high school students, CASEL states Expeditionary Learning is effective in middle school, though the program is deliverable to

---

⁵¹ “Redefining and Raising Student Achievement.” EL Education. https://eleducation.org/who-we-are/our-approach

⁵² Figure text taken directly from: Ibid.
students in Grades PK through 12. CASEL specifically cites Expeditionary Learning’s extensive integration in classroom, school, family, and community settings as well as its embedment in teaching practices, academic instruction, and organizational practices as strengths.\(^{53}\) The curriculum integrates SEL principles into core academic subjects—language arts, social studies, math, and science—and the arts.\(^{54}\)

In a literature review on Expeditionary Learning, researchers from Mid-Continent Research for Education and Learning conclude that the model’s “emphasis on character and motivation creates an atmosphere that encourages engagement through effort, persistence, civic engagement, and identification with school,” facilitating future student success.\(^{55}\) Additionally, a district-specific report from Oakland Unified School District in California found that its implementation of Expeditionary Learning and other SEL strategies reduced student suspensions and helped sustain a districtwide commitment to positive school climate.\(^{56}\)

**INSTRUCTIONAL DELIVERY**

Classroom instruction should build students’ SEL competencies with a balanced approach. Instruction can follow a cycle whereby the teacher: (1) sets lesson objectives; (2) introduces new concepts and models new skills; (3) provides opportunities for group and individual practice; and (4) allows time for self-reflection and assessment. Teachers can use both direct instruction on SEL topics and modeling of SEL skills in conjunction with active tasks that allow students to practice skills and apply knowledge. Throughout the lesson’s progression, instructional staff should monitor student interactions to ensure successful understanding and usage of SEL skills. Teachers may also ask students to reflect on their progress and assess how they can advance their proficiency with SEL skills.\(^{57}\)

SEL instruction must also “implement a set of focused, high-quality, research-based teaching strategies” to effectively develop students’ SEL skills.\(^{58}\) Researchers from the Harvard Graduate School of Education compiled a list of common SEL instructional practices used in PK-12 settings that can advance students’ SEL competencies. These strategies include discussion; role-playing situations where SEL skills are applicable; and the use of songs,

---

\(^{56}\) “Oakland.” CASEL. http://www.casel.org/partner-districts/oakland-unified-school-district/

videos, and visuals to promote understanding (see Figure 2.3). As a practical example of a school using visual displays to promote SEL, an elementary school in Alpine School District in American Fork, Utah posts signs around the building “[encouraging] students to show respect, compassion, resilience, and self-mastery by entering into a drawing if they show those qualities.”

Source: Harvard Graduate School of Education

Explicit skill instruction is an effective strategy to boost students’ SEL competencies. Teachers can specifically address how a given skill applies in daily life and can break down strategies into smaller, more manageable components. A teacher can then model the skill for students and clarify specific situations in which students can employ the skill. As lessons progress, students should receive opportunities to practice target skills and receive formative feedback until proficiency is evident. Teachers can further facilitate student SEL aptitudes –

---

60 Figure adapted from: Ibid., pp. 19–20.

specifically regarding interpersonal interactions – through cooperative learning tasks. In such tasks, students will need to navigate peer relationships, communicate effectively, and monitor progress toward formative and summative goals. To incentivize participation, teachers can establish collective and individual accountability measures.\(^{62}\)

**CLASSROOM MANAGEMENT**

Effective classroom management strategies can improve SEL instruction as teachers strive to create a responsive classroom that nurtures student belonging and increases comfort. Establishing a responsive classroom can help “create a calm, orderly environment that promotes autonomy and allows students to focus on learning.”\(^{63}\)

**Discipline should be student-centered and developmentally appropriate to students while also encouraging positive behavior.** Students and teachers should collaborate to develop classroom rules. Similarly, teachers should avoid overmanaging students or using punitive measures to force compliance and instead opt for students to have opportunities for choice and self-direction in the classroom. Such actions will give students a voice and give them a chance for meaningful input in their education.\(^{64}\)

**Teachers should also be conscientious of the language they use when speaking with students.** Teachers should actively encourage student effort to use SEL-positive skills rather than exclusively praising achievement. For example, a teacher can say, “I see that you are trying harder to raise your hand before speaking,” instead of saying, “You did a great job listening today!” Teachers’ interactions with students should also highlight potential areas of improvement and advise students to monitor their own behavior. All verbal communications should be warm and supportive to demonstrate a caring attitude toward students while also demanding that they take responsibility for their own social and emotional development.\(^{65}\)

**ASSESSMENTS**

This subsection reviews four common assessment types – observations of students, surveys, character report cards, and performance tasks – that districts can use to evaluate SEL.

**Observations of Students**

**Student observations are the most common method for assessing SEL.** In a survey of nearly 500 registered users of its website, *Education Week* found that observations of students by teachers or administrators occur in 59 percent of respondents’ schools.\(^{66}\) Using this assessment strategy, the observing educator watches a student at work or play and records detailed notes about observed behaviors and activities. Effective notes should be objective

\(^{63}\) “About Responsive Classroom.” Responsive Classroom. https://www.responsiveclassroom.org/about/

\(^{65}\) Ibid., pp. 12–13.

and avoid subjective interpretations to maximize effectiveness. Common observation techniques include anecdotal records, narrative reports, behavior frequency counts, and checklists.67

Observations are useful as students may be unaware that teachers are assessing them, resulting in a more genuine evaluation of SEL. For example, a teacher might unobtrusively observe two students role-playing a disagreement and assess whether students are using conflict resolution strategies as modeled during direct instruction.68

**Survey Instruments**

Surveys and questionnaires are the second most common method for assessing SEL per *Education Week*’s user survey. In response to the question “Which (if any) of the following approaches does your school use to measure students’ [SEL]?,” 45 percent of respondents said their school surveyed students, 39 percent said their school surveyed teachers, and 37 percent said their school surveyed parents.69 Figure 2.4 on the following page provides a sample of commonly-used SEL survey instruments that are available for free or for purchase.

### CHARACTER REPORT CARDS

**Schools can also integrate SEL indicators into student report cards.** Twenty-one percent of respondents to the *Education Week* survey on SEL assessments reported that their school included indicators of SEL on student report cards. Seventy-five districts and organizations such as San Francisco Unified School District (SFUSD) and the Knowledge Is Power Program (KIPP) charter school network incorporate SEL competencies into report cards. Seventy-six This method is advantageous as schools already allocate time and resources to completing and distributing report cards. In addition, incorporating SEL into regularly-issued report cards allows schools to track students’ progress over time, providing more insight into students’ skill development than the quantitative data obtained from student and teacher surveys. Report cards can also provide more frequent opportunities for conversations about positive behaviors and identifying students who may be at-risk.

KIPP issues Character Growth Cards for middle and high school students on a quarterly basis, which include a teacher and student self-rating of seven behaviors. The assessed behaviors include curiosity, gratitude, grit, optimism, self-control, social intelligence, and zest. A rating of “1” indicates the student “Almost Never” performs the behavior, and a rating of “7” indicates the student “Almost Always” performs the behavior. Figure 2.5 displays a sample portion of the Character Growth Card used to rate the behavior of zest.

PERFORMANCE TASKS

Teachers can assess student’ SEL skills through a series of simulated performance tasks. One web-based program, SELweb, asks students in Grades K-3 to complete tasks assessing social awareness, social meaning, social reasoning, and self-control. Figure 2.6 provides an overview of the SELweb performance tasks used to measure each construct. For example, to assess social awareness, students describe emotions portrayed in presented facial expressions.

Figure 2.6: Overview of SELweb Performance Tasks

Social Awareness: Students rate a set of 10 faces with different facial expressions as happy, sad, angry, scared, or just okay.

Social Meaning: Students are presented with illustrated and narrated vignettes in which a character may be disappointed, scared, sarcastic, lying, hiding feelings, or harboring a false belief. The student is then asked to correctly answer questions about the character’s mental state.

Social Reasoning: Students are presented with illustrated and narrated vignettes involving "ambiguous provocation" and "peer entry." After each vignette, students must describe the problem, social goal, and preferred solution in each story.

Self-Control: Students complete a "choice-delay task" and a "frustration-tolerance task" (e.g., games with intentional glitches built in or in which students must wait for a specific item to appear to gain the most points).

Source: Rush University Medical Center Department of Behavioral Sciences
SELweb also features an optional module that asks students to answer questions regarding their peer relationships to provide insight into students’ perceived levels of acceptance by others. After a student completes the task, teachers receive a report with scores in each area, as well as an overall SEL score. Teachers who have used data from these reports have generally found the information to be valuable for informing instruction. For example, the reports allow teachers to identify students who need more social connections or who would benefit from small-group support.\(^83\)
