

## 2015-16 SAGE Summative Tests Parental Exclusion Report

### Background

Utah Code 53A-15-1403(9) permits parents, or students over the age of 18, to request to be excused from tests administered statewide, including the Student Assessment of Growth and Excellence (SAGE) Summative tests. That law also instructs that, as a result of the student opting out of statewide tests, neither the district or charter (LEA) nor its staff should be negatively affected in school grading or employee evaluations. As such, students who were exempt from testing in accordance with this law are excluded from participation and performance calculations for Utah's state accountability measures. These students cannot be excluded from federal accountability measures and reports, however, and are reported as non-participants. This may affect an LEA's qualification for and the reception of certain federal dollars. A student who was not under parental exclusion and did not take the SAGE Summative test due to absence or other reason is counted as a non-participant in both state and federal accountability participation rate calculations.

### Parental Exclusion Rates

For the 2015-2016 school year, 1,215,017 SAGE Summative tests were expected to be taken (including Math, Science, and English Language Arts subject tests). Approximately 5% of these tests were not taken due to the parental exclusion under Utah Code 53A-15-1403(9), which is roughly a 1.8 percentage point increase from the 2014-2015 school year. This percentage was higher in charter schools (12.4%) than in district schools (4.2%). Parental exclusion rates, by LEA, ranged from 0% to 89%. Thirty-three schools had a parental exclusion rate of over 20%. Among these, 16 were charter schools, and 17 were district schools.

District Name	2013-14	2014-15	2015-16	Percentage Points (pp) Change
ALPINE DISTRICT	2.8%	3.2%	4.6%	1.4 pp
