From Surviving to Thriving...A Journey to Positive Well-Being: Students learn at high levels when they feel healthy, safe, engaged, supported and challenged. A whole child approach to education is essential to increased academic achievement and positive well-being. Whether it’s individualized student services, school climate, or family engagement, all educators need continued support in strengthening their actions and methods as well as safeguarding their personal well-being along the journey. This conference will provide you with updated information, strategies, and tools to implement a whole child approach that leads students toward college, career and life readiness.
